

Parsha Venkata Vas

+91-6302610199 — venkatavas467@gmail.com — GitHub — LinkedIn

Professional Summary

Software Engineer with hands-on experience in Python development, backend systems, workflow automation, REST APIs, testing, and troubleshooting. Developed automation solutions that reduced manual effort by 40% while improving operational efficiency and reliability. Skilled in debugging, database operations, SDLC practices, and AI-powered application development with a strong interest in production support, incident management, and enterprise software systems.

Technical Skills

Programming: Python, Java, JavaScript, SQL

Application Development: Flask, Spring Boot, REST APIs, API Integration

Databases: MySQL, MongoDB, SQL Queries

Testing & Support: Debugging, Integration Testing, Regression Testing, Root Cause Analysis

Tools: Git, GitHub, Postman, Jira (Basic), CI/CD Fundamentals

AI & Automation: Workflow Automation, ETL Pipelines, Machine Learning Fundamentals

Experience

Software Developer Intern — Multiplier AI

Jun 2025 – Aug 2025

- Developed and validated backend REST APIs using Python, improving workflow reliability and application stability.
- Automated backend operational workflows using Python, reducing manual effort by 40
- Diagnosed and resolved application issues through log analysis, defect reproduction, and root-cause investigation across multiple environments.
- Performed SQL-based data validation and workflow verification to support troubleshooting and issue resolution.
- Executed integration testing, regression testing, and API validation activities to ensure software quality.
- Collaborated with developers and QA engineers to support scalable backend systems and successful software releases.
- Participated throughout SDLC phases including requirement analysis, testing, deployment support, documentation, and issue tracking.

Summer Research Intern — Research Centre Imarat (RCI), DRDO

May 2024 – Jun 2024

- Developed a standalone system auditing tool in Python to extract and analyze 15+ critical system parameters.
- Automated system information collection using Python libraries and Windows Registry integration, reducing manual effort and improving accuracy.
- Designed automated data extraction workflows supporting system diagnostics and technical analysis.
- Validated tool outputs across multiple execution environments to ensure reliability and consistency.
- Delivered a lightweight auditing solution providing rapid system insights for end users.

Projects

AI-Powered Support Assistant

Python, Flask, REST APIs

- Developed an AI-powered chatbot integrating backend services, REST APIs, and conversational workflows.
- Implemented API integrations and validation mechanisms to ensure reliable application behavior.
- Designed error-handling and debugging workflows improving interaction reliability between services.
- Tested conversational and API workflows across multiple usage scenarios.

AI-Driven Governance Analytics Platform

Python, Machine Learning

- Built a scalable analytics platform processing governance datasets across 630+ administrative units.
- Designed end-to-end ETL pipelines covering data ingestion, transformation, validation, analysis, and reporting.
- Implemented anomaly detection and clustering techniques supporting intelligent monitoring and decision-making.
- Developed automated reporting workflows generating structured HTML and JSON outputs.

Movie Review System

Spring Boot, React, MongoDB

- Developed a full-stack web application supporting authentication, role-based access control, and review management.
- Designed backend APIs and validated end-to-end workflows across frontend and backend systems.
- Performed functional and integration testing to ensure stable application behavior.

Education

Gokaraju Rangaraju Institute of Technology

Bachelor of Technology in Information Technology

No Active Backlogs

2021 – 2025

CGPA: 7.9/10

Leadership & Activities

- Led and coordinated 15-member teams for college events and sustainability initiatives.
- Managed sponsorships exceeding INR 25,000 while coordinating stakeholder communication and execution.
